MEMORANDUM FOR: National Intelligence Officer for Economics  
Director, Office of European Analysis, DDI  
Director, Office of Global Issues, DDI

FROM : Special Assistant to the Director for  
Interdepartmental Affairs

SUBJECT : Additional Material for NSC Meeting on Economics

1. Following our meeting yesterday and [redacted] meeting today with the Director, the Director asked that I make sure that specific data is included in the package being prepared for the NSC on East-West trade.

25X1

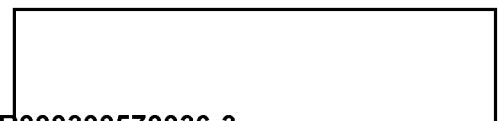

2. Attached is a list of some specific questions, most of which you probably already intend to answer in the work we laid out yesterday. Let me suggest, however, that as one of the backup attachments in the Director's NSC package you perhaps construct a data sheet listing the data asked for in this memo. The assessment itself can make reference to the data, of course, as appropriate.

NSC - ECONOMICS

1. The US-European economic relationship:

- a. How much does the US export to Europe?
- b. How much do we import?
- c. What is the product mix?
- d. What have the trends been during the last decade or so?

-- previously-published chart showing shift of US exports, by percentage, away from Europe.

2. European trade:

- a. What percentage of European-country exports remain within the EC?
- b. What percentage go to the US?
- c. What percentage go to the LDCs, Mideast, NICs, etc.
- d. What percentage of European exports go to Eastern Europe and

the USSR?

-- country-by-country breakdown, to show importance of

Eastern Europe/USSR to key Western European economies

-- chart, previously published by SOVA, comparing European exports to Eastern Europe/USSR with exports to the US as percentage of total Western European country exports

-- estimate of the number of jobs in key Western European countries dependent on exports to Eastern Europe/USSR and US
